Return to Volleyball Guidelines

General Principles:
- All skills should be performed in the presence of an Athletic Trainer, Physical Therapist, or qualified coach to stress proper mechanics.
- The athlete should ice the affected extremity for 20 minutes following any overhead activity.
- The athlete should only progress to the next Step of each Phase if he/she is able to complete the current Step without pain or difficulty.
- Under the direction of the Physical Therapist or Athletic Trainer, the athlete may progress through the Steps and Phases as tolerated.
- Emphasis should be placed on developing and maintaining proper mechanics without developing symptoms.
